

Project name: VALUE2SEA

VALUE2SEA is a project in the EU programme InterReg OKS. The project aims to enhance the collaboration in the Oresund-Kattegat-Skagerrak area.

Partners

Leading partner: Aalborg University – Centre for Logistics (CELOG) (DK)

Academic partners: Chalmers (S) SSPA (S), USN (N)

Ports: Port of Moss (N), Port of Borg (N), Port of Larvik (N),
Port of Grenland (N), Port of Kristiansand (N),
Port of Arendal (N), Port of Hirtshals (DK)

Additional partners: Vestfold Fylkeskommune (N), ASKO (N), Integrate (DK),
Jula (S), Vendelbo Spedition (DK), Arctic Group (DK),
Fjord Line (DK), MARCOD (DK)

Purpose

- To increase eco-friendly transportation in selected corridors
- To identify improvement opportunities in the OKS transport chains
- To apply new technologies, logistics and transport concepts, which will benefit the environment and the traffic at sea in an economic and sustainable way
- To create the foundation for new innovative and sustainable transportation solutions in the Scandinavian region

Work packages

- 1) Sustainable logistics and transport systems including cooperation models
- 2) Address the options of and influence on the transport patterns from electrifying ports and transport systems, autonomous ships etc.
- 3) Digitalisation of transport systems
- 4) Project management
- 5) External and internal communication

Results

The results of the project will be announced via:

- 8 publications and articles
- 3 strategy documents about multimodal solutions, digital technologies and concepts as well as autonomous and electrical transport chains
- 12 student projects about exciting ideas and surveys. The projects will also promote the mobility and collaboration between researcher across the region
- Conferences and seminars for interested parties from the industry
- Reports from the work packages

Communication

MARCOD and the Port of Hirtshals are in charge of communication.
